

BIM Implementation Strategies Training Course

Professional Development Training Course Outline

Category	Architectural Engineering	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Building Information Modeling (BIM) has become a transformative force in the Architecture, Engineering, and Construction (AEC) industry, enabling smarter, data-driven, and fully integrated project delivery. BIM Implementation Strategies Training Course is designed to equip professionals with advanced knowledge of BIM workflows, standards, collaboration frameworks, and digital construction technologies that enhance productivity, reduce costs, and improve project lifecycle management.

As global construction rapidly shifts toward digital twin technology, smart infrastructure, and cloud-based collaboration, mastering BIM implementation is no longer optional but essential. This course empowers learners to strategically deploy BIM across organizational processes, ensuring alignment with ISO 19650 standards, lean construction principles, and industry 4.0 innovations for sustainable and efficient project execution.

Programme Curriculum

BIM Implementation Strategies Training Course

Introduction

Building Information Modeling (BIM) has become a transformative force in the Architecture, Engineering, and Construction (AEC) industry, enabling smarter, data-driven, and fully integrated project delivery. BIM Implementation Strategies Training Course is designed to equip professionals with advanced knowledge of BIM workflows, standards, collaboration frameworks, and digital construction technologies that enhance productivity, reduce costs, and improve project lifecycle management.

As global construction rapidly shifts toward digital twin technology, smart infrastructure, and cloud-based collaboration, mastering BIM implementation is no longer optional but essential. This course empowers learners to strategically deploy BIM across organizational processes, ensuring alignment with ISO 19650 standards,

lean construction principles, and industry 4.0 innovations for sustainable and efficient project execution.

Course Duration

5 days

Course Objectives

1. Master BIM implementation frameworks for AEC projects
2. Understand ISO 19650 BIM standards compliance
3. Develop digital construction workflow optimization skills
4. Apply cloud-based BIM collaboration strategies
5. Enhance clash detection and coordination management
6. Integrate digital twin technology in construction lifecycle
7. Implement 5D BIM cost estimation techniques
8. Strengthen BIM project lifecycle management capabilities
9. Explore AI-driven BIM automation tools
10. Improve interoperability using open BIM standards (IFC)
11. Build expertise in BIM execution planning (BEP)
12. Optimize construction risk management using BIM analytics
13. Advance skills in sustainable smart city BIM applications

Target Audience

1. Architects and Architectural Designers
2. Civil and Structural Engineers
3. Construction Project Managers
4. BIM Coordinators and BIM Managers
5. Quantity Surveyors and Cost Engineers
6. MEP Engineers and Consultants
7. Real Estate Developers and Infrastructure Planners
8. AEC Students and Research Scholars

Course Modules

Module 1: BIM Fundamentals and Digital Construction

- Introduction to BIM concepts and evolution
- BIM dimensions (3D, 4D, 5D, 6D, 7D) overview
- BIM vs traditional CAD workflows
- BIM lifecycle in AEC industry
- Case Study: Adoption of BIM in Dubai Smart City Projects

Module 2: BIM Standards and ISO 19650 Framework

- Understanding ISO 19650 requirements
- BIM execution planning (BEP) structure
- Information management principles
- Global BIM compliance strategies
- Case Study: UK Government BIM Level 2 Implementation

Module 3: BIM Software Ecosystem and Tools

- Revit, Navisworks, ArchiCAD overview
- BIM 360 cloud collaboration tools
- IFC interoperability standards
- Model coordination platforms
- Case Study: Cross-platform BIM integration in metro rail project

Module 4: BIM Coordination and Clash Detection

- Clash detection methodologies
- Multi-disciplinary model coordination
- Issue tracking and resolution workflows
- Federated model management
- Case Study: Hospital construction clash reduction using BIM

Module 5: 4D Scheduling and 5D Cost Estimation

- Construction sequencing with 4D BIM
- Cost integration in 5D BIM models
- Time-cost optimization strategies
- Resource allocation modeling
- Case Study: Highway infrastructure cost optimization using BIM

Module 6: BIM in Facility and Asset Management

- 6D BIM for sustainability analysis
- 7D BIM for facility management
- Digital twin integration
- Lifecycle asset tracking
- Case Study: Smart airport facility management using BIM

Module 7: Advanced BIM Analytics and AI Integration

- AI-driven BIM automation
- Predictive analytics in construction
- Generative design workflows
- Data-driven decision-making
- Case Study: AI-optimized skyscraper design project

Module 8: BIM Implementation Strategy and Enterprise Adoption

- Organizational BIM maturity models
- BIM adoption roadmap
- Change management in AEC firms
- Cloud BIM enterprise deployment
- Case Study: Global construction firm BIM transformation strategy

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.

- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500

Start Date	End Date	Location	Price
12 Oct 2026	16 Oct 2026	Physical	\$1,500
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
