

Blockchain Technology for Cooperative Supply Chains and Finance Training Course

Professional Development Training Course Outline

Category	Cooperative Societies	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The rise of blockchain technology is revolutionizing how cooperative societies manage their supply chains and financial systems, driving transparency, efficiency, and accountability across all cooperative operations. Training Course on Blockchain Technology for Cooperative Supply Chains and Finance is designed to empower cooperative leaders, finance managers, supply chain professionals, and technology innovators with actionable insights and technical skills to adopt, implement, and scale blockchain solutions in their respective sectors. Through expert-led instruction, practical case studies, and hands-on modules, participants will gain a strategic understanding of blockchain's potential to decentralize trust, streamline financial services, and optimize logistics in the cooperative ecosystem.

As cooperatives increasingly face challenges related to traceability, fraud prevention, member financing, and cross-border transactions, blockchain offers a secure and auditable digital infrastructure. This course delivers up-to-date tools and practices to implement smart contracts, use token-based finance models, and establish blockchain-powered logistics systems. Participants will explore real-world applications, build technical knowledge, and evaluate policy and regulatory frameworks supporting blockchain deployment in cooperative contexts.

Programme Curriculum

Blockchain Technology for Cooperative Supply Chains and Finance Training Course

Introduction

The rise of blockchain technology is revolutionizing how cooperative societies manage their supply chains and financial systems, driving transparency, efficiency, and accountability across all cooperative operations. Blockchain Technology for Cooperative Supply Chains and Finance Training Course is designed to empower cooperative leaders, finance managers, supply chain professionals, and technology innovators with actionable insights and technical skills to adopt, implement, and scale blockchain solutions in their respective sectors. Through expert-led instruction, practical case studies, and hands-

on modules, participants will gain a strategic understanding of blockchain's potential to decentralize trust, streamline financial services, and optimize logistics in the cooperative ecosystem.

As cooperatives increasingly face challenges related to traceability, fraud prevention, member financing, and cross-border transactions, blockchain offers a secure and auditable digital infrastructure. This course delivers up-to-date tools and practices to implement smart contracts, use token-based finance models, and establish blockchain-powered logistics systems. Participants will explore real-world applications, build technical knowledge, and evaluate policy and regulatory frameworks supporting blockchain deployment in cooperative contexts.

Course Objectives

1. Understand the fundamentals of blockchain and decentralized ledger technologies.
2. Explore blockchain applications in cooperative supply chain transparency.
3. Analyze digital finance solutions enabled by blockchain in cooperatives.
4. Implement smart contracts for cooperative business automation.
5. Enhance security and traceability in cooperative supply networks.
6. Apply blockchain to reduce costs and intermediaries in cooperative finance.
7. Leverage tokenization for cooperative asset ownership and fundraising.
8. Integrate blockchain with IoT and AI in smart supply chains.
9. Examine regulatory and compliance issues affecting blockchain use.
10. Develop blockchain strategies aligned with cooperative principles.
11. Evaluate case studies on blockchain adoption in global cooperatives.
12. Design and prototype blockchain solutions for local cooperative contexts.
13. Foster innovation and digital transformation in cooperative organizations.

Target Audience

1. Cooperative Supply Chain Managers
2. Cooperative Finance Officers
3. Blockchain Developers and Engineers
4. Technology Officers in Cooperatives
5. Cooperative Board Members and Leaders
6. Agribusiness and Farmers' Cooperative Representatives
7. Policy Makers and Regulators
8. ICT and Innovation Consultants for Cooperatives

Course Duration: 10 days

Course Modules

Module 1: Introduction to Blockchain for Cooperatives

- What is Blockchain and DLT?
- Public vs. Private Blockchains
- Blockchain Benefits for Cooperatives
- Key Features: Immutability, Decentralization
- Blockchain Terminologies and Tools
- *Case Study: Mondragon Cooperative Blockchain Pilot (Spain)*

Module 2: Blockchain in Supply Chain Traceability

- Real-time Tracking and Provenance
- Reducing Counterfeit and Fraud
- Distributed Ledgers for Inventory
- Stakeholder Transparency and Trust

- Smart Sensors and Data Integration
- *Case Study: Provenance Blockchain in Kenyan Coffee Cooperatives*

Module 3: Blockchain-Enabled Cooperative Finance

- Peer-to-Peer Lending Models
- Blockchain Wallets and Payments
- Digital Identity and KYC on Blockchain
- Transparent Dividend Distribution
- Cross-Border Remittances
- *Case Study: CoopCoin Finance Initiative in Brazil*

Module 4: Smart Contracts in Cooperatives

- What Are Smart Contracts?
- Automating Member Agreements
- Payment and Delivery Triggers
- Legal Considerations in Smart Contracts
- Auditable Contract Records
- *Case Study: Ethereum Smart Contracts for Dairy Cooperatives (India)*

Module 5: Tokenization for Member Equity and Fundraising

- Types of Tokens: Utility vs. Security
- Digital Shares for Members
- Blockchain Crowdfunding Models
- Token Governance in Cooperatives
- Managing Token Supply and Demand
- *Case Study: Tokenized Cooperative Ownership in Sweden*

Module 6: Blockchain & Digital Identity for Members

- Self-Sovereign Identity
- Biometric-Linked Member Profiles
- Privacy and Data Protection
- Access Control in Digital Systems
- Inclusion and Accessibility
- *Case Study: Blockchain ID for Rural Cooperatives in Uganda*

Module 7: Blockchain and IoT Integration in Supply Chains

- IoT Devices for Data Capture
- Blockchain Sensor Synchronization
- Real-Time Performance Dashboards
- Predictive Maintenance
- Sustainability Monitoring
- *Case Study: IoT + Blockchain in Cold Chain Cooperatives (Vietnam)*

Module 8: Cybersecurity in Blockchain Systems

- Blockchain Network Security
- Consensus Mechanisms (PoW, PoS)
- Avoiding Double Spending
- Smart Contract Vulnerabilities
- Backup and Recovery Solutions
- *Case Study: Blockchain Breach Response by Co-op Tech Canada*

Module 9: Regulatory Landscape for Blockchain in Cooperatives

- Legal Frameworks Across Regions
- AML/KYC Regulations
- Compliance and Licensing
- Taxation of Crypto Transactions
- Cooperative-Specific Policies
- *Case Study: EU Blockchain Regulation Impact on Cooperatives*

Module 10: Blockchain for Financial Inclusion

- Reaching Unbanked Members
- Mobile Blockchain Wallets
- Savings Groups on Blockchain
- Gender Equity in Finance Access
- Training & Literacy Programs
- *Case Study: Blockchain Savings Circles in Tanzania*

Module 11: Designing Blockchain Governance Models

- Governance Structures in DLT
- Voting Mechanisms and Proposals
- DAO Structures in Cooperatives
- Decision-Making Tools
- Stakeholder Alignment
- *Case Study: DAO-based Cooperative in Canada*

Module 12: Building a Blockchain Strategy

- Roadmapping Blockchain Initiatives
- Cost-Benefit Analysis
- Partner and Vendor Selection
- Building Cross-Functional Teams
- Pilot and Scale-Up Phases
- *Case Study: Strategy Blueprint of a Logistics Cooperative (Netherlands)*

Module 13: Blockchain Infrastructure and Deployment

- Node Setup and Hosting Options
- Cloud vs. On-Premise
- API Integration
- Network Maintenance
- Performance Monitoring Tools
- *Case Study: Hyperledger Infrastructure in Multi-Coop Platform (Philippines)*

Module 14: Ethical and Environmental Considerations

- Energy Usage in Mining
- Blockchain Sustainability
- Ethical Token Design
- Digital Divide and Access
- Transparent Practices
- *Case Study: Green Blockchain Cooperative Models (Finland)*

Module 15: Capstone Project & Peer Review

- Choose a Use Case

- Develop Implementation Plan
- Prototype a Solution
- Peer-to-Peer Feedback
- Final Presentation and Certificate
- *Case Study: Group Blockchain Projects from Previous Cohort*

Training Methodology

- Interactive lectures with blockchain experts
- Hands-on workshops and simulation labs
- Case study analysis and group discussions
- Real-world cooperative project design
- Capstone project with mentoring and review

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	18 Sep 2026	Physical	\$3,000
14 Sep 2026	25 Sep 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000

Start Date	End Date	Location	Price
28 Sep 2026	09 Oct 2026	Physical	\$3,000
05 Oct 2026	16 Oct 2026	Physical	\$3,000
12 Oct 2026	23 Oct 2026	Physical	\$3,000
19 Oct 2026	30 Oct 2026	Physical	\$3,000
26 Oct 2026	06 Nov 2026	Physical	\$3,000
