

Category Management Basics Training Course

Professional Development Training Course Outline

Category	Logistics and Supply Chain Management	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Category Management Basics Training Course is designed to provide participants with comprehensive knowledge and practical skills necessary to manage product categories effectively in a competitive retail environment. The course emphasizes strategic decision-making, data-driven analysis, and best practices for optimizing product assortment, pricing, promotions, and supplier collaboration. Participants will gain insights into category planning, performance monitoring, and consumer-driven merchandising techniques that enhance overall business profitability.

This course also focuses on the integration of advanced analytical tools, inventory management principles, and market intelligence to drive actionable insights. Participants will learn to implement category strategies that align with organizational goals, improve customer satisfaction, and strengthen competitive advantage. Through practical exercises, real-world case studies, and interactive sessions, learners will develop the skills to make informed decisions and lead category management initiatives with confidence.
