### Course Introduction

Corporate Actions in Securities Markets Training Course is meticulously designed for financial professionals, operations specialists, and market participants seeking in-depth knowledge of corporate actions and their impact on securities markets. Participants will gain practical expertise in handling corporate events such as dividends, mergers, acquisitions, stock splits, rights issues, and spin-offs while understanding regulatory frameworks, market standards, and operational workflows. This course emphasizes accurate processing, risk mitigation, and efficient communication across custodians, depositories, and brokers, ensuring participants can confidently navigate complex corporate action events in global financial markets.

With a focus on real-world applications and actionable insights, this training combines theoretical foundations with interactive case studies, enabling participants to bridge the gap between knowledge and implementation. Learners will develop competencies in event identification, record-keeping, entitlements calculation, and reconciliation processes while leveraging technology to optimize operations. By the end of this course, participants will be equipped to enhance operational efficiency, reduce errors, and strengthen compliance in securities processing, ultimately contributing to the overall performance and credibility of their organizations in the capital markets.
