

Digital Sensors and IoT for Real-Time Monitoring Training Course

Professional Development Training Course Outline

Category	Monitoring and Evaluation	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today’s rapidly evolving technological landscape, Digital Sensors and IoT (Internet of Things) are revolutionizing the way industries monitor, analyze, and optimize processes in real time. Digital Sensors and IoT for Real-Time Monitoring Training Course offers an in-depth exploration of smart sensing technologies, real-time data acquisition, and IoT-enabled monitoring systems, empowering participants to leverage cutting-edge digital solutions for enhanced operational efficiency, predictive maintenance, and data-driven decision-making. Participants will gain practical insights into the integration of wireless sensors, IoT platforms, cloud analytics, and edge computing to create sustainable and scalable monitoring systems.

This course emphasizes hands-on learning with real-world applications, preparing professionals to implement IoT solutions for industries, smart cities, healthcare, agriculture, and manufacturing. Through interactive sessions, case studies, and live demonstrations, learners will develop the skills needed to design, deploy, and manage digital sensor networks for real-time monitoring, anomaly detection, and process optimization. By the end of this course, participants will be able to harness IoT technologies to transform data into actionable insights, improving efficiency, reliability, and innovation across multiple sectors.

Programme Curriculum

Digital Sensors and IoT for Real-Time Monitoring Training Course

Introduction

In today’s rapidly evolving technological landscape, Digital Sensors and IoT (Internet of Things) are revolutionizing the way industries monitor, analyze, and optimize processes in real time. Digital Sensors and IoT for Real-Time Monitoring Training Course offers an in-depth exploration of smart sensing technologies, real-

time data acquisition, and IoT-enabled monitoring systems, empowering participants to leverage cutting-edge digital solutions for enhanced operational efficiency, predictive maintenance, and data-driven decision-making. Participants will gain practical insights into the integration of wireless sensors, IoT platforms, cloud analytics, and edge computing to create sustainable and scalable monitoring systems.

This course emphasizes hands-on learning with real-world applications, preparing professionals to implement IoT solutions for industries, smart cities, healthcare, agriculture, and manufacturing. Through interactive sessions, case studies, and live demonstrations, learners will develop the skills needed to design, deploy, and manage digital sensor networks for real-time monitoring, anomaly detection, and process optimization. By the end of this course, participants will be able to harness IoT technologies to transform data into actionable insights, improving efficiency, reliability, and innovation across multiple sectors.

Course Duration

5 days

Course Objectives

By the end of this training, participants will be able to:

1. Understand the fundamentals of digital sensors and IoT technologies.
2. Design and deploy real-time monitoring systems using IoT platforms.
3. Implement wireless sensor networks for continuous data acquisition.
4. Apply edge computing and cloud analytics for real-time insights.
5. Integrate predictive maintenance and anomaly detection using IoT data.
6. Optimize industrial processes with smart sensing and automation.
7. Utilize IoT protocols, standards, and security best practices.
8. Analyze sensor data for decision-making and operational efficiency.
9. Explore IoT applications in healthcare, agriculture, and smart cities.
10. Develop IoT dashboards and visualization tools for monitoring.
11. Apply data-driven strategies for energy management and sustainability.
12. Evaluate emerging IoT trends and future monitoring technologies.
13. Implement case-study-based projects to solve real-world monitoring challenges.

Target Audience

1. IoT Engineers and Technologists
2. Industrial Automation Professionals
3. Data Analysts and Data Scientists
4. Operations and Maintenance Managers
5. Smart City and Urban Technology Planners
6. Healthcare Technology Specialists
7. Agriculture Technology Professionals
8. Engineering Students and Technology Enthusiasts

Course Modules

Module 1: Introduction to Digital Sensors and IoT

- Types of digital sensors and their applications
- Basics of IoT architecture and protocols
- Overview of real-time monitoring systems

- Sensor calibration and data accuracy
- **Case Study:** IoT deployment in a smart manufacturing plant

Module 2: Wireless Sensor Networks (WSN)

- Design and topology of WSN
- Sensor node components and communication
- Data transmission and reliability
- Energy efficiency in WSN
- **Case Study:** Environmental monitoring using WSN

Module 3: IoT Platforms and Cloud Integration

- IoT cloud platforms and services
- Data storage, retrieval, and processing
- Real-time dashboards and visualization
- API integration for IoT devices
- **Case Study:** Cloud-based smart home monitoring system

Module 4: Edge Computing for Real-Time Data Processing

- Introduction to edge computing
- Edge vs. cloud processing
- Reducing latency in IoT systems
- Security considerations at the edge
- **Case Study:** Edge computing in industrial automation

Module 5: Data Analytics and Predictive Monitoring

- Basics of IoT data analytics
- Machine learning for predictive maintenance
- Detecting anomalies and trends in sensor data
- Reporting and decision-making tools
- **Case Study:** Predictive maintenance in energy systems

Module 6: IoT Security and Protocols

- Common IoT security threats
- Authentication and encryption methods
- Secure communication protocols (MQTT, CoAP)
- Best practices for IoT cybersecurity
- **Case Study:** Securing smart healthcare devices

Module 7: Industry-Specific Applications

- IoT in manufacturing, agriculture, and healthcare
- Smart city monitoring solutions
- Energy management and sustainability
- Case-based implementation strategies
- **Case Study:** IoT-enabled irrigation system in agriculture

Module 8: Project Implementation and Hands-On Labs

- Designing an end-to-end IoT monitoring project
- Sensor selection and deployment
- Real-time data collection and analysis
- Building dashboards for stakeholders
- **Case Study:** Full-scale IoT monitoring solution in a factory

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commencement of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
------------	----------	----------	-------

07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
