

Equity and Inclusion in M&E Design Training Course

Professional Development Training Course Outline

Category	Monitoring and Evaluation	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Equity and Inclusion in Monitoring and Evaluation (M&E) Design is a critical approach for ensuring that development, humanitarian, and social programs are responsive, fair, and accountable to diverse populations. Traditional M&E systems often fail to capture systemic inequalities, intersectionality, and power dynamics, leading to data that excludes marginalized groups such as women, persons with disabilities, ethnic minorities, youth, migrants, and indigenous populations. Equity and Inclusion in M&E Design Training Course emphasizes inclusive evaluation frameworks, disaggregated data, participatory methodologies, and rights-based approaches to strengthen evidence-based decision-making and social impact.

This training equips practitioners with practical tools to embed equity, diversity, and inclusion (EDI) throughout the M&E cycle from program design and indicator development to data collection, analysis, and learning. Participants will explore gender-transformative evaluation, inclusive indicators, ethical data practices, localization, and adaptive learning, supported by real-world case studies. The course aligns with SDGs, ESG reporting, DEI strategies, and results-based management (RBM) to ensure programs leave no one behind.
