

Ethics in Qualitative Research Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Qualitative research provides deep insights into human behavior, social dynamics, and organizational processes. However, the richness of qualitative data comes with a critical responsibility: adhering to ethical principles that protect participants, maintain research integrity, and ensure credibility of findings. Ethics in Qualitative Research Training Course equips researchers, academicians, and professionals with the knowledge and practical skills needed to navigate complex ethical challenges. Through real-world case studies, interactive discussions, and applied exercises, participants will learn to implement ethical frameworks, informed consent, confidentiality protocols, and data governance standards in qualitative research settings.

This course emphasizes the integration of emerging ethical considerations, including digital data privacy, cross-cultural research ethics, and inclusive research practices. Participants will gain a robust understanding of ethical dilemmas, regulatory compliance, and strategies for ethical decision-making that enhance both the validity and social impact of qualitative research. By the end of this program, learners will be prepared to conduct ethically sound research while upholding professional standards, fostering research transparency, accountability, and participant trust.
