## Course Introduction

In today's rapidly evolving IT landscape, effective license management and entitlement support have become critical to organizational compliance, cost optimization, and operational efficiency. Organizations face increasing challenges in tracking software usage, avoiding over-licensing or under-licensing, and maintaining regulatory compliance. License Management and Entitlement Support Procedures Training Course empowers professionals with practical knowledge and hands-on strategies for software asset management (SAM), license optimization, and entitlement governance, ensuring seamless alignment with industry standards and business objectives.

Through a structured blend of theory, practical exercises, and real-world case studies, this course equips participants to manage license lifecycles, validate software entitlements, and implement robust compliance frameworks. By the end of this training, learners will gain actionable skills to reduce software compliance risks, enhance vendor relationship management, and maximize IT resource ROI, positioning themselves as valuable contributors to enterprise technology governance.
