

Media & Health Communication Training Course

Professional Development Training Course Outline

Category	Public Health	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In the rapidly evolving digital ecosystem, Media and Health Communication has become a critical pillar for shaping public awareness, influencing health behaviors, and strengthening global health systems. Media & Health Communication Training Course is designed to equip learners with cutting-edge competencies in strategic health messaging, digital media engagement, risk communication, and misinformation management. With the rise of social media health campaigns, AI-driven communication tools, and real-time crisis reporting, professionals must master both traditional and digital communication channels to effectively reach diverse audiences.

This course integrates public health communication theories, behavioral science, media production techniques, and data-driven storytelling to enhance impact in health promotion. Participants will learn how to design evidence-based campaigns, combat health misinformation, leverage influencer ecosystems, and use analytics for audience targeting. The program is tailored for the modern communication landscape where pandemics, digital misinformation, vaccine hesitancy, and global health crises demand precise, ethical, and impactful messaging strategies.

Programme Curriculum

Media & Health Communication Training Course

Introduction

In the rapidly evolving digital ecosystem, Media and Health Communication has become a critical pillar for shaping public awareness, influencing health behaviors, and strengthening global health systems. Media & Health Communication Training Course is designed to equip learners with cutting-edge competencies in strategic health messaging, digital media engagement, risk communication, and misinformation management. With the rise of social media health campaigns, AI-driven communication tools, and real-time crisis reporting, professionals must master both traditional and digital communication channels to effectively reach diverse

audiences.

This course integrates public health communication theories, behavioral science, media production techniques, and data-driven storytelling to enhance impact in health promotion. Participants will learn how to design evidence-based campaigns, combat health misinformation, leverage influencer ecosystems, and use analytics for audience targeting. The program is tailored for the modern communication landscape where pandemics, digital misinformation, vaccine hesitancy, and global health crises demand precise, ethical, and impactful messaging strategies.
