

Oligonucleotide Therapeutics Development Training Course

Professional Development Training Course Outline

Category	Biotechnology and Pharmaceutical Development	Duration	10 Days
Base Fee	\$4,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Oligonucleotide Therapeutics Development Training Course is designed to equip professionals with in-depth knowledge and practical skills necessary to navigate the rapidly evolving field of oligonucleotide-based therapies. This training provides a comprehensive understanding of the science, technology, regulatory landscape, and clinical application of antisense oligonucleotides (ASOs), small interfering RNAs (siRNAs), and mRNA therapeutics. Participants will explore the entire pipeline of oligonucleotide drug development, from preclinical research to clinical trials, ensuring they are well-versed in the latest innovations, challenges, and best practices in this cutting-edge sector.

This course is highly relevant in the current landscape where oligonucleotide-based drugs are at the forefront of precision medicine, offering transformative solutions for genetic disorders, cancers, and infectious diseases. As RNA therapeutics are increasingly becoming a viable treatment option, understanding the science and regulatory framework behind their development is critical for professionals seeking to remain competitive in this fast-growing market. This course is ideal for those who want to stay ahead in the dynamic and promising field of biotechnology, pharmaceuticals, and biopharma by mastering the intricacies of oligonucleotide drug development.

Programme Curriculum

Oligonucleotide Therapeutics Development Training Course

Introduction

Oligonucleotide Therapeutics Development Training Course is designed to equip professionals with in-depth knowledge and practical skills necessary to navigate the rapidly evolving field of oligonucleotide-based

therapies. This training provides a comprehensive understanding of the science, technology, regulatory landscape, and clinical application of antisense oligonucleotides (ASOs), small interfering RNAs (siRNAs), and mRNA therapeutics. Participants will explore the entire pipeline of oligonucleotide drug development, from preclinical research to clinical trials, ensuring they are well-versed in the latest innovations, challenges, and best practices in this cutting-edge sector.

This course is highly relevant in the current landscape where oligonucleotide-based drugs are at the forefront of precision medicine, offering transformative solutions for genetic disorders, cancers, and infectious diseases. As RNA therapeutics are increasingly becoming a viable treatment option, understanding the science and regulatory framework behind their development is critical for professionals seeking to remain competitive in this fast-growing market. This course is ideal for those who want to stay ahead in the dynamic and promising field of biotechnology, pharmaceuticals, and biopharma by mastering the intricacies of oligonucleotide drug development.

Course Duration

10 days

Course Objectives

1. Understand the fundamental principles of oligonucleotide therapeutics.
2. Explore the latest RNA technologies, including mRNA, siRNA, and ASOs.
3. Examine the drug discovery and development processes for oligonucleotides.
4. Gain insights into the preclinical research methodologies and animal models used in oligonucleotide drug development.
5. Master the regulatory pathways for FDA and EMA approval of oligonucleotide therapies.
6. Learn the formulation and delivery systems for effective oligonucleotide therapies.
7. Understand the clinical trial design specific to oligonucleotide therapeutics.
8. Investigate drug toxicity and safety profiling in oligonucleotide-based therapeutics.
9. Evaluate the biomarkers used to monitor therapeutic efficacy and patient response.
10. Understand the commercialization strategies for oligonucleotide-based drugs.
11. Review case studies of successful oligonucleotide therapies, including FDA-approved drugs.
12. Explore the challenges of manufacturing and scalability in oligonucleotide-based therapies.
13. Stay updated with emerging trends in genetic medicine and gene editing technologies.

Target Audience

1. Pharmaceutical Scientists.
2. Biotech Researchers.
3. Regulatory Affairs Professionals in drug approval processes.
4. Clinical Research Professionals.
5. Biotechnology Engineers.
6. Medical Affairs Specialists in the field of precision medicine.
7. Project Managers.
8. Healthcare Executives.

Course Modules

Module 1: Introduction to Oligonucleotide Therapeutics

- Overview of oligonucleotide therapeutics

- History and evolution of RNA-based therapies
- Case studies: Key players and market trends
- Understanding the drug discovery process
- Overview of clinical trial phases

Module 2: RNA Mechanisms & Targets

- RNA interference and gene silencing mechanisms
- Role of mRNA in therapeutic development
- ASOs and their mechanism of action
- Target validation in RNA therapeutics
- Case studies: Genetic diseases treatable by RNA-based therapies

Module 3: Oligonucleotide Chemistry & Design

- Synthesis of oligonucleotides
- Modifications and stabilization strategies
- Case studies: Delivery challenges and strategies
- Formulation of RNA-based drugs
- Chemical properties of RNA therapeutics

Module 4: Preclinical Research & Animal Models

- Overview of preclinical testing
- Selection of animal models
- Case studies: Efficacy and safety testing
- Early pharmacokinetics and pharmacodynamics
- Biomarker identification for early-stage testing

Module 5: Regulatory Framework & Approval

- Regulatory agencies (FDA, EMA, etc.)
- Navigating preclinical and clinical trial regulations
- IND and NDA submission processes
- Case studies: FDA and EMA guidance for RNA-based therapies
- Orphan drug designation and accelerated approval

Module 6: Drug Delivery Systems for Oligonucleotides

- Lipid nanoparticles for mRNA delivery
- Nanomedicine approaches for gene delivery
- Targeted delivery strategies
- Intracellular delivery mechanisms
- Case studies: Challenges in drug formulation and stability

Module 7: Clinical Trial Design for Oligonucleotides

- Designing clinical trials for gene-based therapies
- Endpoints and clinical biomarkers
- Patient selection criteria
- Managing patient safety in clinical trials
- Case studies: Real-world data and post-marketing surveillance

Module 8: Safety, Toxicity, and Immunogenicity

- Identifying potential toxicities
- Immunogenicity risks with oligonucleotide therapies
- Case studies: Risk management strategies
- Long-term safety monitoring
- Adverse events in RNA therapies

Module 9: Gene Editing and RNA-Based Therapies

- CRISPR and RNA interference
- Advances in gene-editing technologies
- mRNA-based vaccines and therapeutic use
- Ethical considerations of gene editing
- Case studies of gene-editing therapies

Module 10: Biomarkers & Monitoring Therapeutic Efficacy

- Identification of predictive biomarkers
- Efficacy monitoring in clinical trials
- Companion diagnostics for RNA therapies
- Personalized medicine in oligonucleotide therapies
- Case studies: Post-treatment monitoring and follow-up

Module 11: Oligonucleotide Therapeutics in Cancer Treatment

- Cancer as a target for RNA-based therapies
- Mechanisms of action in cancer cells
- Case studies of approved RNA cancer therapies
- Tumor microenvironment and therapeutic challenges
- Future directions in oncology

Module 12: Commercialization of Oligonucleotide Therapies

- Market analysis for RNA therapeutics
- Pricing and reimbursement strategies
- IP protection and patenting in RNA drugs
- Case studies: Strategic partnerships and licensing agreements
- Scaling up from clinical trials to market

Module 13: Global Trends & Future of Oligonucleotide Therapies

- Emerging market opportunities for RNA drugs
- The role of artificial intelligence in RNA therapy development
- Innovations in RNA delivery systems
- Regulatory trends and policy changes
- Case studies: The future of personalized RNA medicines

Module 14: Manufacturing Challenges & Solutions

- Scaling production of RNA therapeutics
- Quality control and assurance in RNA manufacturing

- Good Manufacturing Practices (GMP) for RNA drugs
- Supply chain considerations
- Case studies on overcoming manufacturing challenges

Module 15: Case Studies & Real-World Applications

- Success stories of approved oligonucleotide-based drugs
- Key lessons from failed therapeutic trials
- Impact of RNA therapies on healthcare outcomes
- Case studies: Regulatory challenges in RNA drug approval
- Future perspectives and ongoing research

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.com or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commencement of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	18 Sep 2026	Physical	\$4,000
14 Sep 2026	25 Sep 2026	Physical	\$4,000
21 Sep 2026	02 Oct 2026	Physical	\$4,000
28 Sep 2026	09 Oct 2026	Physical	\$4,000
05 Oct 2026	16 Oct 2026	Physical	\$4,000
12 Oct 2026	23 Oct 2026	Physical	\$4,000
19 Oct 2026	30 Oct 2026	Physical	\$4,000
26 Oct 2026	06 Nov 2026	Physical	\$4,000
