

Pedestrian Crossing Design and Visibility Training Course

Professional Development Training Course Outline

Category	Traffic Management & Road Safety	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Urban mobility safety has become a critical focus worldwide, as pedestrian fatalities and near-misses continue to rise despite modern traffic management systems. Pedestrian Crossing Design and Visibility Training Course equips urban planners, traffic engineers, and transportation professionals with the latest knowledge and practical skills to enhance pedestrian safety, reduce accidents, and optimize urban mobility flows. Participants will gain hands-on experience in designing high-visibility crossings, implementing sustainable urban transport solutions, and leveraging smart traffic safety technologies to mitigate risk.

This course emphasizes evidence-based design principles, human-centered urban planning, and advanced visibility engineering to ensure pedestrians are seen and protected in all environments. Through real-world case studies, interactive workshops, and simulation exercises, attendees will learn to translate technical guidelines into actionable, high-impact solutions. By the end, participants will be proficient in integrating safety, accessibility, and efficiency in pedestrian crossing design, ultimately contributing to safer streets and smarter cities.

Programme Curriculum

Pedestrian Crossing Design and Visibility Training Course

Introduction

Urban mobility safety has become a critical focus worldwide, as pedestrian fatalities and near-misses continue to rise despite modern traffic management systems. Pedestrian Crossing Design and Visibility Training Course equips urban planners, traffic engineers, and transportation professionals with the latest knowledge and practical skills to enhance pedestrian safety, reduce accidents, and optimize urban mobility flows. Participants will gain hands-on experience in designing high-visibility crossings, implementing sustainable urban transport

solutions, and leveraging smart traffic safety technologies to mitigate risk.

This course emphasizes evidence-based design principles, human-centered urban planning, and advanced visibility engineering to ensure pedestrians are seen and protected in all environments. Through real-world case studies, interactive workshops, and simulation exercises, attendees will learn to translate technical guidelines into actionable, high-impact solutions. By the end, participants will be proficient in integrating safety, accessibility, and efficiency in pedestrian crossing design, ultimately contributing to safer streets and smarter cities.

Course Duration

5 days

Course Objectives

1. Master pedestrian visibility analysis techniques to reduce accidents.
2. Understand urban traffic flow management in pedestrian-heavy zones.
3. Design high-visibility crosswalks compliant with global standards.
4. Apply road safety audits and pedestrian risk assessments effectively.
5. Implement lighting and signage optimization for night-time safety.
6. Utilize geospatial mapping tools for pedestrian crossing planning.
7. Integrate smart city technologies to enhance crossing safety.
8. Analyze pedestrian behavior and movement patterns.
9. Apply traffic calming measures for safer pedestrian zones.
10. Conduct cost-benefit analysis of safety interventions.
11. Develop inclusive and accessible pedestrian infrastructure.
12. Evaluate crosswalk effectiveness using real-world metrics.
13. Build data-driven pedestrian safety strategies for urban planners.

Target Audience

1. Urban Planners and City Designers
2. Traffic and Transportation Engineers
3. Road Safety Auditors
4. Civil and Structural Engineers
5. Policy Makers and Municipal Officials
6. Smart City Technology Developers
7. Road Safety NGOs and Advocacy Groups
8. Public Health and Safety Researchers

Course Modules

Module 1: Introduction to Pedestrian Safety & Urban Mobility

- Overview of global pedestrian safety statistics
- Understanding urban mobility trends and challenges
- Key pedestrian accident causes and risk factors
- Principles of human-centered design for crossings
- **Case Study:** New York City Vision Zero pedestrian initiatives

Module 2: Pedestrian Crossing Design Principles

- Types of crosswalks and their applications
- Sight distance and visibility calculations
- Curb extensions, medians, and pedestrian refuges
- Material and marking choices for high visibility
- **Case Study:** London's Raised Table Crosswalk Implementation

Module 3: Traffic Flow & Pedestrian Interaction

- Analyzing pedestrian-vehicle conflict points
- Traffic calming measures: speed humps, chicanes, and narrowing
- Signalized and unsignalized crossings
- Pedestrian signal timing and phasing strategies
- **Case Study:** Singapore's Pedestrian Countdown Signals

Module 4: Visibility Enhancement & Lighting Solutions

- Night-time visibility techniques and best practices
- Reflective materials and high-contrast markings
- LED and solar-powered lighting integration
- Dynamic warning systems for high-risk zones
- **Case Study:** Tokyo's Smart Crosswalk Lighting System

Module 5: Smart Technologies & Data Analytics

- IoT sensors and pedestrian detection systems
- AI-assisted traffic management solutions
- GIS mapping and predictive safety modeling
- Data-driven decision-making for crossing placements
- **Case Study:** Barcelona's Smart Pedestrian Network

Module 6: Safety Audits & Risk Assessment

- Conducting comprehensive pedestrian safety audits
- Identifying high-risk locations using crash data
- Risk scoring and prioritization methods
- Mitigation planning and intervention strategies
- **Case Study:** Melbourne's High-Risk Intersection Revamp

Module 7: Accessibility & Inclusive Design

- Designing for children, elderly, and persons with disabilities
- ADA compliance and universal design principles
- Tactile paving and auditory signaling systems
- Ensuring safe crossing in multi-modal transit areas
- **Case Study:** Copenhagen's Accessible Pedestrian Infrastructure

Module 8: Implementation & Policy Integration

- Cost-benefit analysis and resource allocation
- Developing safety policies and urban design guidelines
- Stakeholder engagement and public awareness campaigns
- Monitoring and evaluation of implemented solutions

- **Case Study:** Bogotá's Ciclovía and Pedestrian Priority Initiatives

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
