

Road Safety and Climate Resilience Planning Training Course

Professional Development Training Course Outline

Category	Traffic Management & Road Safety	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Road Safety and Climate Resilience Planning Training Course equips professionals, urban planners, and policymakers with advanced strategies to design, implement, and monitor road infrastructure that is both safe and resilient to climate-related hazards. This comprehensive course integrates cutting-edge methodologies in sustainable transport planning, risk assessment, and climate adaptation, enabling participants to address critical challenges such as extreme weather events, traffic fatalities, and urban congestion. Leveraging global best practices, participants gain actionable insights to enhance community resilience, optimize traffic management, and improve emergency response planning in the context of climate uncertainties.

Through a combination of theoretical knowledge, practical exercises, and real-world case studies, this training empowers stakeholders to adopt data-driven decision-making, implement smart mobility solutions, and foster environmentally responsible infrastructure development. Participants will explore innovative approaches to road safety audits, resilient transport networks, and sustainable urban mobility, equipping them to design projects that meet both current and future demands. By the end of the course, attendees will possess the competencies required to transform urban and rural transport systems into safe, efficient, and climate-resilient networks.

Programme Curriculum

Road Safety and Climate Resilience Planning Training Course

Introduction

Road Safety and Climate Resilience Planning Training Course equips professionals, urban planners, and policymakers with advanced strategies to design, implement, and monitor road infrastructure that is both safe

and resilient to climate-related hazards. This comprehensive course integrates cutting-edge methodologies in sustainable transport planning, risk assessment, and climate adaptation, enabling participants to address critical challenges such as extreme weather events, traffic fatalities, and urban congestion. Leveraging global best practices, participants gain actionable insights to enhance community resilience, optimize traffic management, and improve emergency response planning in the context of climate uncertainties.

Through a combination of theoretical knowledge, practical exercises, and real-world case studies, this training empowers stakeholders to adopt data-driven decision-making, implement smart mobility solutions, and foster environmentally responsible infrastructure development. Participants will explore innovative approaches to road safety audits, resilient transport networks, and sustainable urban mobility, equipping them to design projects that meet both current and future demands. By the end of the course, attendees will possess the competencies required to transform urban and rural transport systems into safe, efficient, and climate-resilient networks.

Course Duration

5 days

Course Objectives

1. Enhance understanding of road safety principles and climate-resilient infrastructure planning.
2. Develop skills in risk assessment for climate-related transport hazards.
3. Apply sustainable urban mobility strategies to reduce traffic accidents and congestion.
4. Implement smart transport solutions using data-driven tools and analytics.
5. Strengthen community resilience through integrated road safety interventions.
6. Promote eco-friendly transport planning to mitigate environmental impacts.
7. Conduct road safety audits and infrastructure vulnerability assessments.
8. Improve emergency preparedness and response strategies for extreme events.
9. Design resilient road networks adaptable to climate change scenarios.
10. Integrate policy frameworks for sustainable and safe transport development.
11. Leverage geospatial technologies for infrastructure planning and monitoring.
12. Benchmark global best practices in road safety and climate resilience.
13. Foster stakeholder collaboration for inclusive and effective planning.

Target Audience

1. Urban and transport planners
2. Civil engineers
3. Disaster risk management professionals
4. Municipal and government officials
5. Environmental planners
6. Policy makers
7. NGO and community development professionals
8. Academics and researchers in transport and climate resilience

Course Modules

Module 1: Introduction to Road Safety & Climate Resilience

- Overview of global road safety challenges
- Climate change impacts on transport infrastructure
- Integrating resilience into transport planning

- Risk identification and hazard mapping
- Case Study: Netherlands' climate-adaptive road networks

Module 2: Risk Assessment and Vulnerability Analysis

- Tools for climate risk assessment in transport
- Vulnerability mapping of road networks
- Prioritizing high-risk zones for interventions
- Scenario planning for extreme weather events
- Case Study: Flood-resilient highways in Bangladesh

Module 3: Sustainable Urban Mobility Planning

- Principles of sustainable transport design
- Reducing traffic congestion through smart solutions
- Promoting active transport
- Integration of public transport systems
- Case Study: Copenhagen's sustainable urban mobility plan

Module 4: Road Safety Audits and Accident Prevention

- Conducting comprehensive safety audits
- Identifying accident-prone zones
- Implementing preventive measures
- Monitoring and evaluation frameworks
- Case Study: Vision Zero strategy in Sweden

Module 5: Resilient Infrastructure Design

- Climate-resilient road construction methods
- Material selection for extreme weather conditions
- Adaptive design for flooding and heatwaves
- Maintenance planning under climate stress
- Case Study: Elevated roads in Jakarta

Module 6: Policy, Governance, and Regulatory Frameworks

- Transport safety regulations and standards
- Climate adaptation policies for infrastructure
- Stakeholder engagement strategies
- Cross-sector collaboration for resilience
- Case Study: India's National Road Safety Policy

Module 7: Smart Technologies in Road Safety & Resilience

- GIS and remote sensing applications
- Intelligent transport systems (ITS)
- Early warning systems for extreme events
- Data analytics for accident prediction and mitigation
- Case Study: Singapore's smart transport solutions

Module 8: Community Engagement & Capacity Building

- Participatory planning for safer roads
- Public awareness campaigns on road safety
- Training local authorities and communities
- Monitoring and feedback mechanisms
- Case Study: Community-driven road safety in Kenya

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.com or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
------------	----------	----------	-------

07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
