

Statistical Process Control (SPC) for Decision Making Training Course

Professional Development Training Course Outline

Category	Quality Assurance and ISO standards	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Statistical Process Control (SPC) is a critical methodology for improving quality, productivity, and decision making in modern organizations. By leveraging real-time data, trend analysis, and predictive insights, SPC helps organizations minimize variability, reduce waste, and make evidence-based decisions that drive sustainable success. Statistical Process Control (SPC) for Decision Making Training Course is designed to provide participants with practical skills in SPC tools, data-driven problem-solving, root cause analysis, and process optimization to support smarter business strategies.

With industries becoming more competitive, mastering SPC has become essential for maintaining high performance and operational excellence. Through this course, participants will explore advanced data monitoring systems, quality improvement techniques, and decision-making frameworks that enhance organizational resilience. The training combines theory with real-life case studies, ensuring participants can apply SPC principles directly to their work environment, driving continuous improvement and measurable results.

Programme Curriculum

Statistical Process Control (SPC) for Decision Making Training Course

Introduction

Statistical Process Control (SPC) is a critical methodology for improving quality, productivity, and decision making in modern organizations. By leveraging real-time data, trend analysis, and predictive insights, SPC helps organizations minimize variability, reduce waste, and make evidence-based decisions that drive sustainable success. Statistical Process Control (SPC) for Decision Making Training Course is designed to provide participants with practical skills in SPC tools, data-driven problem-solving, root cause analysis, and

process optimization to support smarter business strategies.

With industries becoming more competitive, mastering SPC has become essential for maintaining high performance and operational excellence. Through this course, participants will explore advanced data monitoring systems, quality improvement techniques, and decision-making frameworks that enhance organizational resilience. The training combines theory with real-life case studies, ensuring participants can apply SPC principles directly to their work environment, driving continuous improvement and measurable results.

Course Objectives

1. Understand the fundamentals of Statistical Process Control and its application in decision making.
2. Develop proficiency in SPC charts, trend analysis, and variation control.
3. Apply data-driven approaches for effective process monitoring.
4. Enhance problem-solving skills using SPC techniques.
5. Implement root cause analysis for improved process reliability.
6. Explore the use of SPC in predictive decision-making.
7. Improve product quality and customer satisfaction using SPC tools.
8. Identify patterns and trends that impact operational performance.
9. Integrate SPC with quality management systems.
10. Optimize processes to achieve lean manufacturing and Six Sigma goals.
11. Reduce costs and waste through effective SPC application.
12. Strengthen compliance with industry standards using SPC frameworks.
13. Build decision-making confidence using real-time SPC data insights.

Organizational Benefits

1. Improved operational efficiency and productivity.
2. Reduced process variation and enhanced quality control.
3. Increased competitiveness through data-driven decision making.
4. Cost savings through defect reduction and waste elimination.
5. Enhanced compliance with international quality standards.
6. Higher customer satisfaction and trust.
7. Stronger culture of continuous improvement.
8. Better forecasting and predictive analytics for business growth.
9. Integration of SPC with lean and Six Sigma practices.
10. Improved workforce capability in quality management.

Target Audiences

1. Quality Managers and Quality Control Professionals
2. Process Engineers and Production Managers
3. Operations and Manufacturing Managers
4. Data Analysts and Business Analysts
5. Continuous Improvement Practitioners
6. Lean and Six Sigma Professionals
7. Compliance and Regulatory Officers
8. Senior Managers and Decision Makers

Course Duration: 5 days

Course Modules

Module 1: Introduction to SPC and Decision Making

- Foundations of Statistical Process Control
- Understanding process variation
- Role of SPC in quality improvement
- Data-driven decision-making principles
- Linking SPC to organizational strategy
- Case Study: SPC adoption in manufacturing operations

Module 2: SPC Tools and Techniques

- Control charts and their applications
- Identifying common vs. special causes of variation
- Process capability analysis
- Measurement system analysis
- Data collection and sampling methods
- Case Study: Reducing defects using SPC charts

Module 3: Root Cause Analysis with SPC

- Identifying root causes through SPC
- Pareto analysis integration
- Fishbone diagram application
- Problem-solving frameworks
- Linking data to corrective actions
- Case Study: Eliminating bottlenecks using SPC methods

Module 4: SPC for Predictive Decision Making

- Predictive analytics through SPC
- Monitoring trends and forecasting outcomes
- Early detection of process shifts
- Decision-making with confidence intervals
- Integration with big data and AI tools
- Case Study: Predictive SPC in healthcare systems

Module 5: SPC in Quality Management Systems

- Role of SPC in ISO and industry standards
- Linking SPC to TQM practices
- Regulatory compliance through SPC
- Aligning SPC with Six Sigma initiatives
- Auditing and reporting SPC results
- Case Study: Meeting compliance through SPC frameworks

Module 6: Process Optimization with SPC

- Reducing process variability
- Linking SPC to lean manufacturing
- Continuous improvement methodologies

- Enhancing operational efficiency
- Sustainable process design using SPC
- Case Study: Optimizing production lines with SPC

Module 7: Advanced SPC Applications

- Multivariate SPC approaches
- Real-time SPC dashboards
- Automation of SPC systems
- Industry 4.0 and SPC integration
- Advanced trend monitoring
- Case Study: Real-time SPC implementation in logistics

Module 8: Implementing SPC in Organizations

- Steps for successful SPC implementation
- Overcoming challenges in SPC adoption
- Training and workforce engagement
- Measuring ROI from SPC initiatives
- Building a culture of data-driven improvement
- Case Study: SPC transformation in service industries

Training Methodology

- Interactive lectures with practical exercises
- Group discussions and collaborative workshops
- Hands-on training using real-life case studies
- Data-driven simulations and role plays
- Practical application through SPC software tools
- Action plans for workplace implementation

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Online	\$1,100
14 Sep 2026	18 Sep 2026	Online	\$1,100
21 Sep 2026	25 Sep 2026	Online	\$1,100
28 Sep 2026	02 Oct 2026	Online	\$1,100
05 Oct 2026	09 Oct 2026	Online	\$1,100
12 Oct 2026	16 Oct 2026	Online	\$1,100
19 Oct 2026	23 Oct 2026	Online	\$1,100
26 Oct 2026	30 Oct 2026	Online	\$1,100
