

Training Course on Internet of Things (IoT) in Smart Classrooms

Professional Development Training Course Outline

Category	Educational Leadership and Management	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

The integration of the Internet of Things (IoT) in smart classrooms is revolutionizing the education sector by enhancing student engagement, improving learning outcomes, and enabling real-time data-driven decisions. IoT in education leverages interconnected devices, intelligent sensors, cloud platforms, and automation tools to create a highly responsive and personalized learning environment. Training Course on Internet of Things (IoT) in Smart Classrooms empowers educators, administrators, and IT leaders with the skills needed to plan, implement, and optimize IoT-based learning systems, making classrooms smarter, safer, and more efficient.

As educational institutions pivot towards digital transformation and smart learning environments, this course provides hands-on expertise in the design, implementation, and management of IoT frameworks in the classroom setting. By exploring cutting-edge tools like AI integration, wearable tech, environmental sensors, and smart whiteboards, participants will be equipped to create immersive and adaptive learning experiences. The course also addresses data privacy, cybersecurity, and interoperability to ensure seamless and secure smart learning environments.

Programme Curriculum

Training Course on Internet of Things (IoT) in Smart Classrooms

Introduction

The integration of the Internet of Things (IoT) in smart classrooms is revolutionizing the education sector by enhancing student engagement, improving learning outcomes, and enabling real-time data-driven decisions. IoT in education leverages interconnected devices, intelligent sensors, cloud platforms, and automation tools to create a highly responsive and personalized learning environment. Training Course on Internet of Things (IoT) in Smart Classrooms empowers educators, administrators, and IT leaders with the skills needed to plan, implement, and optimize IoT-based learning systems, making classrooms smarter, safer, and more efficient.

As educational institutions pivot towards digital transformation and smart learning environments, this course provides hands-on expertise in the design, implementation, and management of IoT frameworks in the classroom setting. By exploring cutting-edge tools like AI integration, wearable tech, environmental sensors, and smart whiteboards, participants will be equipped to create immersive and adaptive learning experiences. The course also addresses data privacy, cybersecurity, and interoperability to ensure seamless and secure smart learning environments.

Course Objectives

1. Understand the fundamentals of IoT in education technology.
2. Explore smart classroom infrastructure using connected devices.
3. Learn to deploy sensors for real-time student engagement tracking.
4. Implement cloud-based data storage and analytics for learning outcomes.
5. Use AI and IoT integration to personalize learning experiences.
6. Monitor classroom environmental conditions using smart sensors.
7. Automate attendance and performance tracking with IoT.
8. Evaluate cybersecurity frameworks for IoT in smart schools.
9. Analyze interoperability between IoT devices and LMS platforms.
10. Design energy-efficient and sustainable smart classrooms.
11. Apply data-driven decision-making in educational management.
12. Test and troubleshoot IoT systems in educational environments.
13. Explore future trends in EdTech and IoT convergence.

Target Audience

1. K-12 School Administrators
2. University Faculty & Lecturers
3. IT Managers in Education
4. EdTech Entrepreneurs
5. Instructional Designers
6. Government Education Planners
7. Policy Makers in Digital Education
8. Professional Development Trainers

Course Duration: 5 days

Course Modules

Module 1: Introduction to IoT in Education

- Definition and scope of IoT
- Benefits of IoT in smart learning environments
- IoT architecture and components
- Key trends in educational IoT systems
- Challenges in implementation
- **Case Study:** IoT adoption in Finland's K-12 schools

Module 2: IoT Infrastructure in Smart Classrooms

- Devices and networks for smart classrooms
- Sensor placement and connectivity
- Cloud platforms and edge computing
- Scalability and system design
- Maintenance and lifecycle management
- **Case Study:** Smart classroom setup in Singapore Smart Nation initiative

Module 3: Data Analytics and AI for Personalized Learning

- Role of AI in IoT-driven education
- Learning analytics dashboards
- Predictive performance insights
- Behavior monitoring using IoT
- Custom learning pathways
- **Case Study:** AI-IoT learning systems at Georgia Tech

Module 4: Classroom Automation & Smart Devices

- Smart boards and intelligent whiteboards
- Automated attendance systems
- Wearables for student tracking
- Voice-activated assistant tools
- Integrating with LMS platforms
- **Case Study:** IoT classroom automation in South Korea

Module 5: Environmental Monitoring and Energy Efficiency

- Smart HVAC and lighting controls
- Air quality and CO2 monitoring
- Noise level detection
- Occupancy sensors for energy saving
- Green classroom certifications
- **Case Study:** Energy-efficient classrooms in California public schools

Module 6: Cybersecurity and Privacy in IoT Learning

- Threat landscape in IoT classrooms
- Device authentication and encryption
- Data privacy regulations (FERPA, GDPR)
- Intrusion detection in smart networks
- Ethical use of student data
- **Case Study:** Cybersecurity policy implementation in Dubai Smart Learning Project

Module 7: IoT Integration with Learning Management Systems

- API and middleware use cases
- Real-time data syncing with LMS
- Multi-device data collection
- Customizable alerts and reports
- Cloud vs. on-premise integration
- **Case Study:** Moodle-IoT integration in UK secondary schools

Module 8: Future Trends & Strategic Planning

- Emerging IoT trends in education
- Digital twins in classroom simulations
- Edge AI and 5G-enabled learning
- Policy and funding frameworks
- Strategic planning for EdTech roadmap
- **Case Study:** Strategic IoT roadmap at MIT's Open Learning Lab

Training Methodology

- Interactive instructor-led sessions

- Real-time virtual labs with IoT devices
- Group-based case study analysis
- Capstone project: Design a smart classroom IoT plan
- Peer collaboration and feedback cycles
- Access to LMS-based digital resource library

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500

Start Date	End Date	Location	Price
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
