

Training course on Mobile Technology for Social Protection Outreach and Monitoring

Professional Development Training Course Outline

Category	Social Protection	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Mobile technology has emerged as a transformative force in the delivery of social protection, offering unprecedented opportunities to extend outreach, streamline program operations, and enhance real-time monitoring and evaluation. Training Course on Mobile Technology for Social Protection Outreach and Monitoring is meticulously designed to equip with the expert knowledge and practical methodologies to strategically design, implement, and manage mobile-based solutions for effective social protection outreach and robust monitoring. The program delves into user-centered design for mobile applications, mobile data collection best practices, remote monitoring techniques, beneficiary communication strategies, and the critical considerations of digital literacy, data security, and inclusive design, blending rigorous analytical frameworks with practical, hands-on application, extensive global case studies (with a strong emphasis on successful and challenging African experiences, including Kenya's Inua Jamii program), and intensive mobile application design, data collection, and M&E dashboard development exercises. Participants will gain the strategic foresight and technical expertise to confidently harness the power of mobile technology, fostering unparalleled reach, efficiency, and real-time oversight in social protection, thereby securing their position as indispensable leaders in building responsive and data-driven social welfare systems. This intensive 10-day program delves into nuanced methodologies for conducting comprehensive needs assessments for mobile-based interventions, mastering sophisticated techniques for designing intuitive mobile interfaces that cater to low-literacy users, and exploring cutting-edge approaches to integrating mobile data with centralized Management Information Systems (MISs), leveraging geospatial data for targeting and monitoring, and utilizing advanced analytics to derive actionable insights from mobile-collected data. A significant focus will be placed on understanding the interplay of mobile technology with existing social protection delivery chains and national digital public infrastructure, the specific challenges of ensuring last-mile connectivity and device affordability, and the practical application of human-centered design principles to mitigate exclusion and enhance user adoption.

Programme Curriculum

Training Course on Mobile Technology for Social Protection Outreach and Monitoring

Introduction

Mobile technology has emerged as a transformative force in the delivery of social protection, offering unprecedented opportunities to extend outreach, streamline program operations, and enhance real-time monitoring and evaluation. From empowering frontline workers with mobile data collection tools to enabling direct beneficiary communication via SMS and facilitating digital payments through mobile money, these innovations are reshaping how social assistance reaches vulnerable populations. In a country like Kenya, with its world-renowned mobile money ecosystem and high mobile phone penetration, leveraging these tools for social protection is not just feasible but imperative for achieving greater efficiency, accountability, and inclusion. However, unlocking this potential requires navigating critical challenges such as the digital divide, data privacy, and the need for robust system design and capacity building. **Training Course on Mobile Technology for Social Protection Outreach and Monitoring** is meticulously designed to equip **policymakers, social protection program managers, M&E specialists, ICT professionals, frontline workers' supervisors, civil society organizations, and development partners** with the expert knowledge and practical methodologies to **strategically design, implement, and manage mobile-based solutions for effective social protection outreach and robust monitoring**. The program delves into **user-centered design for mobile applications, mobile data collection best practices, remote monitoring techniques, beneficiary communication strategies, and the critical considerations of digital literacy, data security, and inclusive design**, blending rigorous analytical frameworks with practical, hands-on application, extensive global case studies (with a strong emphasis on successful and challenging African experiences, including Kenya's Inua Jamii program), and intensive mobile application design, data collection, and M&E dashboard development exercises. Participants will gain the strategic foresight and technical expertise to confidently harness the power of mobile technology, fostering unparalleled **reach, efficiency, and real-time oversight** in social protection, thereby securing their position as indispensable leaders in **building responsive and data-driven social welfare systems**.

This intensive 10-day program delves into **nuanced methodologies for conducting comprehensive needs assessments for mobile-based interventions**, mastering **sophisticated techniques for designing intuitive mobile interfaces that cater to low-literacy users**, and exploring **cutting-edge approaches to integrating mobile data with centralized Management Information Systems (MISs)**, leveraging **geospatial data for targeting and monitoring**, and utilizing **advanced analytics to derive actionable insights from mobile-collected data**. A significant focus will be placed on understanding the interplay of **mobile technology with existing social protection delivery chains and national digital public infrastructure**, the specific challenges of ensuring **last-mile connectivity and device affordability**, and the practical application of **human-centered design principles to mitigate exclusion and enhance user adoption**. By integrating global industry best practices in mobile for development (M4D) and digital public goods (drawing examples from pioneering mobile-based interventions for health, agriculture, and social transfers in Africa and other developing contexts), analyzing **real-world examples of successful and challenging mobile technology implementations for social protection outreach and monitoring**, and engaging in intensive hands-on **mobile survey design, dashboard creation, communication strategy development, and expert-led discussions on overcoming operational and social barriers**, attendees will develop the **strategic acumen** to confidently lead and participate in the secure and inclusive deployment of mobile solutions, ensuring that social protection programs are not only **efficiently managed but also genuinely accessible, responsive, and accountable to the populations they serve**, thereby securing their position as indispensable leaders in **driving mobile-enabled social development**.

Course Objectives:

Upon completion of this course, participants will be able to:

1. **Analyze core concepts and strategic responsibilities of Mobile Technology for Outreach and Monitoring** in social protection.
2. **Master sophisticated techniques for designing user-centered mobile applications and SMS/USSD platforms** for social protection programs.
3. **Develop robust methodologies for implementing efficient and secure mobile data collection** for social protection M&E.
4. **Implement effective strategies for leveraging mobile technology for targeted beneficiary outreach, communication, and self-registration.**
5. **Manage complex considerations for integrating mobile-collected data with centralized Management Information Systems (MISs) and social registries.**
6. **Apply robust strategies for conducting real-time monitoring and remote supervision** of social protection activities using mobile tools.
7. **Understand the deep integration of mobile technology with grievance redress mechanisms (GRMs) and beneficiary feedback systems.**
8. **Leverage knowledge of global best practices and lessons learned** from countries that have successfully deployed mobile technology for social protection, with a strong focus on African experiences and Kenya's mobile ecosystem.
9. **Optimize strategies for addressing the digital divide, digital literacy gaps, and ensuring equitable access** to mobile-enabled services.
10. **Formulate specialized recommendations for securing mobile data, protecting beneficiary privacy, and preventing mobile-related fraud.**
11. **Conduct comprehensive assessments** of the cost-effectiveness and scalability of mobile technology solutions in diverse social protection contexts.
12. **Navigate challenging situations related to connectivity limitations, device affordability, and fostering user adoption** among vulnerable groups.
13. **Develop a holistic, technologically informed, and inclusive approach to Mobile Technology for Social Protection Outreach and Monitoring**, enhancing program reach, efficiency, and accountability.

Target Audience:

This course is designed for professionals interested in Mobile Technology for Social Protection Outreach and Monitoring:

1. **Policymakers & Senior Government Officials:** From Ministries of Social Protection, ICT, Planning, and Public Service.
2. **Social Protection Program Managers & Directors:** Responsible for program implementation, outreach, and M&E.
3. **M&E Specialists & Data Analysts:** Seeking to leverage mobile technology for improved data collection and analysis.
4. **ICT & Digital Transformation Specialists:** Involved in designing and deploying mobile-based solutions.
5. **Frontline Workers & Supervisors:** Using mobile tools for field operations and beneficiary interaction.
6. **Communication & Outreach Specialists:** Focused on reaching beneficiaries effectively.
7. **Civil Society Organizations (CSOs) & Community Mobilizers:** Working with vulnerable populations and advocating for their needs.
8. **Development Partners & International Organizations:** Supporting digital innovations in social protection.

Course Duration: 10 Days

Course Modules:

- **Module 1: Introduction to Mobile Technology in Social Protection (Day 1)**
 - The evolution of mobile technology and its relevance for social protection.
 - Defining outreach and monitoring in the context of social protection.
 - Benefits of mobile technology: Reach, efficiency, speed, transparency, accountability.
 - Overview of key mobile technologies: SMS, USSD, feature phone apps, smartphone apps.
 - Challenges and risks: Digital divide, privacy, fraud, cost, and context.
- **Module 2: Mobile for Beneficiary Outreach and Communication (Day 1 & 2)**
 - Designing effective mobile communication strategies for beneficiaries.
 - Leveraging SMS/USSD for mass messaging, alerts, and information dissemination.
 - Interactive voice response (IVR) and call centers for information and support.
 - Developing content that is clear, accessible, and culturally appropriate for mobile.
 - Case studies of successful mobile outreach campaigns in social protection.
- **Module 3: Mobile-Based Registration and Enrollment (Day 2)**
 - Exploring mobile-based self-registration mechanisms (web portals, USSD, apps).
 - Supporting frontline workers with mobile tools for assisted registration.
 - Ensuring data accuracy and integrity during mobile enrollment processes.
 - Integrating mobile registration data with national social registries (e.g., Kenya's Single Registry).
 - Addressing inclusion challenges for those with limited mobile access or literacy.
- **Module 4: Mobile Data Collection for Monitoring (Day 3)**
 - Principles of mobile data collection (MDC): Efficiency, real-time data, accuracy.
 - Overview of MDC tools: KoBoToolbox, SurveyCTO, ODK, Magpi.
 - Designing mobile survey forms: Question types, skips, validation rules.
 - Training enumerators and frontline staff on using MDC tools effectively.
 - Ensuring data quality and validation at the point of collection.
- **Module 5: Real-Time Monitoring and Remote Supervision (Day 4)**
 - Using mobile technology for real-time tracking of field activities (e.g., GPS tracking of agent visits).
 - Remote supervision and performance monitoring of frontline workers via mobile dashboards.
 - Collecting photographic or video evidence for verification purposes.
 - Alerts and notifications for critical events or deviations from plans.
 - Dashboard design for program managers to visualize real-time data.
- **Module 6: Mobile for Monitoring Program Delivery and Outcomes (Day 5)**
 - Collecting data on cash transfer delivery, in-kind aid distribution, and service utilization.
 - Monitoring beneficiary satisfaction and perception through mobile surveys.
 - Tracking key performance indicators (KPIs) relevant to program outcomes.
 - Leveraging mobile data for rapid assessments during emergencies (e.g., shock response).
 - Using mobile technology for post-distribution monitoring and impact evaluation.
- **Module 7: Integrating Mobile Data with Management Information Systems (Day 6)**
 - Strategies for seamless data flow from mobile devices to centralized MIS platforms.
 - API integration and data synchronization mechanisms.
 - Ensuring data interoperability and standardization across systems.
 - Developing secure data transfer protocols.
 - Leveraging integrated data for comprehensive program analysis.
- **Module 8: Beneficiary Feedback and Grievance Redress through Mobile (Day 7)**
 - Designing mobile-based grievance redress mechanisms (GRMs): SMS, dedicated hotlines.
 - Collecting and categorizing beneficiary feedback via mobile channels.
 - Automated responses and tracking of grievance resolution.

- Promoting accountability and responsiveness through mobile feedback loops.
- Ensuring accessibility for diverse beneficiary groups in GRM design.
- **Module 9: Addressing the Digital Divide and Inclusion (Day 8)**
 - Identifying populations at risk of digital exclusion (e.g., elderly, persons with disabilities, rural, low literacy).
 - Strategies for promoting digital literacy and mobile phone adoption among beneficiaries.
 - Designing hybrid approaches: Combining mobile with traditional outreach methods.
 - Addressing device affordability and connectivity challenges (e.g., partnerships with MNOs).
 - Ensuring gender-responsive design in mobile interventions.
- **Module 10: Security, Privacy, and Ethical Considerations (Day 9)**
 - Securing mobile devices and applications: Device management, secure coding practices.
 - Protecting sensitive beneficiary data collected via mobile.
 - Ensuring compliance with data protection laws (e.g., Kenya DPA) for mobile data.
 - Preventing mobile-related fraud and scams (e.g., phishing awareness for beneficiaries).
 - Ethical implications: Informed consent, data minimization, potential for surveillance.
- **Module 11: Cost-Effectiveness and Scalability of Mobile Solutions (Day 9)**
 - Analyzing the costs and benefits of mobile technology in social protection.
 - Strategies for scaling up pilot mobile interventions to national level.
 - Leveraging existing mobile infrastructure and public-private partnerships.
 - Developing sustainable funding models for mobile-based services.
 - Measuring the return on investment (ROI) for mobile technology adoption.
- **Module 12: Emerging Trends and Future of Mobile in Social Protection (Day 10)**
 - Exploring advanced mobile applications: AI-powered chatbots, voice assistants.
 - The role of IoT and sensors for contextual monitoring in social protection.
 - Integration with blockchain for enhanced traceability via mobile devices.
 - Adaptive social protection and shock-responsiveness through mobile technology.
 - Developing an action plan for leveraging mobile technology in participants' contexts.

Training Methodology

- **Interactive Workshops:** Facilitated discussions, group exercises, and problem-solving activities.
- Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	18 Sep 2026	Physical	\$3,000
14 Sep 2026	25 Sep 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000
28 Sep 2026	09 Oct 2026	Physical	\$3,000
05 Oct 2026	16 Oct 2026	Physical	\$3,000
12 Oct 2026	23 Oct 2026	Physical	\$3,000

Start Date	End Date	Location	Price
19 Oct 2026	30 Oct 2026	Physical	\$3,000
26 Oct 2026	06 Nov 2026	Physical	\$3,000
