

Urban Data Analytics and Smart Cities Research Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today's rapidly urbanizing world, Urban Data Analytics and Smart Cities Research have become critical in shaping sustainable, efficient, and inclusive cities. Urban Data Analytics and Smart Cities Research Training Course equips professionals, researchers, and policymakers with practical skills and theoretical knowledge to harness data-driven decision-making in urban environments. With the growth of smart technologies, IoT, big data, AI, and GIS, this course will empower participants to understand and apply cutting-edge solutions for city planning, mobility, energy, governance, and citizen engagement.

The course integrates urban informatics, predictive analytics, real-time monitoring, and digital twins, enabling participants to address urban challenges through data-centric strategies. It emphasizes interdisciplinary learning, collaboration, and innovation using real-world case studies, simulations, and project-based tasks. This transformative training offers insights into the digital transformation of cities, policy implications, and the role of open data and citizen science in shaping the cities of the future.

Programme Curriculum

Urban Data Analytics and Smart Cities Research Training Course

Introduction

In today's rapidly urbanizing world, Urban Data Analytics and Smart Cities Research have become critical in shaping sustainable, efficient, and inclusive cities. Urban Data Analytics and Smart Cities Research Training Course equips professionals, researchers, and policymakers with practical skills and theoretical knowledge to harness data-driven decision-making in urban environments. With the growth of smart technologies, IoT, big data, AI, and GIS, this course will empower participants to understand and apply cutting-edge solutions for city planning, mobility, energy, governance, and citizen engagement.

The course integrates urban informatics, predictive analytics, real-time monitoring, and digital twins, enabling participants to address urban challenges through data-centric strategies. It emphasizes interdisciplinary learning, collaboration, and innovation using real-world case studies, simulations, and project-based tasks. This transformative training offers insights into the digital transformation of cities, policy implications, and the role of open data and citizen science in shaping the cities of the future.

Course Objectives

1. Understand the fundamentals of urban data analytics and smart city frameworks.
2. Analyze big data applications in urban mobility, infrastructure, and housing.
3. Explore IoT integration in smart urban systems.
4. Develop skills in geospatial analytics and urban mapping.
5. Apply AI and machine learning in urban forecasting and modeling.
6. Evaluate data governance, privacy, and ethics in smart cities.
7. Design data-driven policies for sustainable urban development.
8. Investigate digital twin technologies for urban simulation.
9. Examine real-time urban data collection and visualization tools.
10. Assess the role of open data platforms in urban innovation.
11. Strengthen capacity in predictive modeling for smart governance.
12. Promote community engagement through digital inclusion tools.
13. Conduct research projects using urban data science methodologies.

Target Audiences

1. Urban Planners and City Administrators
2. Data Scientists and Analysts
3. Smart City Project Managers
4. Environmental and Infrastructure Researchers
5. ICT Professionals in Urban Development
6. Government Policy Makers
7. Urban Studies and Geography Scholars
8. Graduate Students in Urban Analytics or Smart Technologies

Course Duration: 5 days

Course Modules

Module 1: Introduction to Urban Data Analytics & Smart Cities

- Definition and evolution of smart cities
- Key components of urban data ecosystems
- Types of urban data (structured/unstructured)
- Benefits of data-driven urban governance
- Trends in smart city innovations
- *Case Study: Barcelona's Smart City Framework*

Module 2: Big Data & Predictive Urban Modeling

- Big data sources in urban contexts
- Predictive analytics for traffic and population
- Data preprocessing techniques
- Urban simulations and scenario building
- Risk and resilience analytics
- *Case Study: Singapore's Predictive Traffic Flow System*

Module 3: IoT Applications in Smart Cities

- Role of IoT sensors in urban infrastructure
- Integration with cloud platforms
- Real-time monitoring of utilities
- Public safety and emergency systems
- Urban mobility and smart transport
- *Case Study: Amsterdam's IoT-Enabled Smart Lighting*

Module 4: GIS and Spatial Urban Analysis

- Fundamentals of GIS in urban planning
- Spatial data collection methods
- Mapping urban inequality and land use
- Remote sensing applications
- GIS for disaster management
- *Case Study: Kigali's GIS-Based Urban Planning Initiative*

Module 5: AI and Machine Learning in Urban Governance

- Urban prediction using ML models
- AI for waste management and energy use
- Natural language processing for urban feedback
- Smart surveillance and urban safety
- Challenges in deploying AI in cities
- *Case Study: AI-Enabled Waste Sorting in Seoul*

Module 6: Urban Data Ethics, Privacy, and Governance

- Ethical use of urban data
- Legal frameworks and compliance (GDPR, etc.)
- Data ownership and transparency
- Citizen rights in smart environments
- Designing inclusive data policies
- *Case Study: Sidewalk Toronto and Data Ethics Controversy*

Module 7: Digital Twins and Simulation for Smart Cities

- Understanding digital twin architecture
- Integrating sensor and GIS data
- Urban simulation and scenario testing
- Real-time feedback for urban planning
- Optimization in smart city services
- *Case Study: Helsinki's Digital Twin Model*

Module 8: Open Data, Citizen Science & Civic Tech

- Open data policies and platforms
- Crowdsourcing and citizen-led data
- Civic tech tools for engagement
- Participatory urban planning
- Building digital trust with communities
- *Case Study: London Datastore and Citizen Engagement*

Training Methodology

- Interactive expert-led sessions

- Hands-on workshops with datasets and tools
- Simulation exercises and group projects
- Case study analysis and discussions
- Use of real-world smart city dashboards
- Continuous assessment and feedback

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500

Start Date	End Date	Location	Price
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
