

Urban Risk Management Training Course

Professional Development Training Course Outline

Category	Architectural Engineering	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Urban Risk Management is a critical discipline focused on identifying, assessing, and mitigating risks that threaten cities and rapidly growing urban environments. With increasing urbanization, climate change impacts, informal settlements, infrastructure pressure, and disaster vulnerabilities, cities face complex and interconnected risks. Urban Risk Management Training Course is designed to equip professionals with advanced competencies in urban resilience, disaster risk reduction (DRR), climate adaptation, emergency preparedness, and sustainable city planning using globally recognized frameworks and data-driven approaches.

The course integrates modern methodologies such as GIS-based risk mapping, smart city analytics, climate risk modeling, early warning systems, and community-based disaster management. Participants will gain practical insights into urban vulnerability assessment, infrastructure resilience planning, and risk-informed urban governance. By the end of the training, learners will be able to design and implement strategic urban risk management solutions aligned with global standards such as the Sendai Framework for Disaster Risk Reduction, SDGs (Sustainable Development Goals), and climate resilience agendas.

Programme Curriculum

Urban Risk Management Training Course

Introduction

Urban Risk Management is a critical discipline focused on identifying, assessing, and mitigating risks that threaten cities and rapidly growing urban environments. With increasing urbanization, climate change impacts, informal settlements, infrastructure pressure, and disaster vulnerabilities, cities face complex and interconnected risks. Urban Risk Management Training Course is designed to equip professionals with advanced competencies in urban resilience, disaster risk reduction (DRR), climate adaptation, emergency

preparedness, and sustainable city planning using globally recognized frameworks and data-driven approaches.

The course integrates modern methodologies such as GIS-based risk mapping, smart city analytics, climate risk modeling, early warning systems, and community-based disaster management. Participants will gain practical insights into urban vulnerability assessment, infrastructure resilience planning, and risk-informed urban governance. By the end of the training, learners will be able to design and implement strategic urban risk management solutions aligned with global standards such as the Sendai Framework for Disaster Risk Reduction, SDGs (Sustainable Development Goals), and climate resilience agendas.

Course Duration

5 days

Course Objectives

1. Understand Urban Risk Governance frameworks and global DRR policies
2. Apply Climate Resilience and Adaptation strategies in urban systems
3. Conduct Hazard Identification and Vulnerability Assessments (HVA)
4. Develop Disaster Risk Reduction (DRR) action plans for cities
5. Use GIS and Remote Sensing for Urban Risk Mapping
6. Strengthen Early Warning Systems (EWS) and Emergency Response mechanisms
7. Integrate Smart City technologies for risk monitoring and analytics
8. Promote Community-Based Disaster Risk Management (CBDRM)
9. Enhance Critical Infrastructure Resilience and Risk Auditing
10. Implement Urban Flood, Heatwave, and Climate Hazard mitigation strategies
11. Build capacity in Emergency Preparedness and Crisis Management
12. Align urban planning with Sustainable Development Goals (SDGs 11 & 13)
13. Develop Data-driven Urban Resilience strategies using AI and Big Data

Target Audience

1. Urban planners and city development officers
2. Disaster risk management professionals
3. Environmental and climate change specialists
4. Government policy makers and municipal authorities
5. Engineers (civil, structural, environmental)
6. NGO and humanitarian workers
7. GIS and data analytics professionals
8. Students and researchers in urban studies

Course Modules

Module 1: Foundations of Urban Risk Management

- Concepts of urban risk and vulnerability
- Types of urban hazards
- Risk assessment frameworks
- Urbanization and risk amplification
- Introduction to global DRR frameworks
- **Case Study:** Urban flooding challenges in rapidly expanding coastal cities and mitigation strategies.

Module 2: Climate Change and Urban Resilience

- Climate risk drivers in urban environments
- Heatwaves, floods, and sea-level rise impacts
- Climate adaptation planning
- Resilience indicators and benchmarking
- Integration of climate policy in urban planning
- **Case Study:** Resilience planning for coastal megacities facing sea-level rise.

Module 3: GIS and Spatial Risk Analysis

- GIS fundamentals for urban risk mapping
- Remote sensing applications
- Spatial data collection and interpretation
- Hazard zoning and exposure mapping
- Digital twin technologies for cities
- **Case Study:** GIS-based flood risk mapping in informal settlements.

Module 4: Disaster Risk Reduction (DRR) Strategies

- Sendai Framework implementation
- Risk-informed urban development
- Structural vs non-structural mitigation
- Policy integration for DRR
- Risk communication strategies
- **Case Study:** Earthquake preparedness planning in high-density urban regions.

Module 5: Early Warning Systems and Emergency Response

- Components of early warning systems
- Real-time monitoring technologies
- Emergency communication protocols
- Evacuation planning and logistics
- Incident command systems (ICS)
- **Case Study:** Cyclone early warning and evacuation success in coastal regions.

Module 6: Smart Cities and Digital Risk Management

- IoT for urban risk monitoring
- AI and predictive analytics
- Big data in disaster forecasting
- Smart infrastructure systems
- Digital governance for resilience
- **Case Study:** Smart city flood prediction system using AI analytics.

Module 7: Community-Based Disaster Risk Management

- Role of communities in resilience building
- Participatory risk assessment
- Local knowledge integration
- Capacity building and training programs
- Social inclusion in DRR

- **Case Study:** Community-led disaster preparedness in informal settlements.

Module 8: Urban Infrastructure and Critical Systems Resilience

- Risk assessment of infrastructure systems
- Lifeline utilities
- Infrastructure interdependency risks
- Retrofitting and resilience engineering
- Urban continuity planning
- **Case Study:** Transport infrastructure failure during extreme flooding events.

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
07 Sep 2026	11 Sep 2026	Physical	\$1,500
14 Sep 2026	18 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$1,500
28 Sep 2026	02 Oct 2026	Physical	\$1,500
05 Oct 2026	09 Oct 2026	Physical	\$1,500
12 Oct 2026	16 Oct 2026	Physical	\$1,500
19 Oct 2026	23 Oct 2026	Physical	\$1,500
26 Oct 2026	30 Oct 2026	Physical	\$1,500
