

# Validation of Cleaning and Sanitation Procedures Training Course

## Professional Development Training Course Outline

|          |                                |               |                         |
|----------|--------------------------------|---------------|-------------------------|
| Category | Food processing and Technology | Duration      | 5 Days                  |
| Base Fee | \$1,500 USD                    | Delivery Mode | Online / On-site Hybrid |

### Course Introduction

Validation of Cleaning and Sanitation Procedures Training Course is designed to equip participants with practical knowledge, advanced techniques, and regulatory insights essential for ensuring effective cleaning and sanitation in industries such as food processing, pharmaceuticals, manufacturing, and healthcare. This program emphasizes process validation, microbial control, hygiene management, and risk-based approaches to enhance safety, compliance, and operational excellence. Participants will gain exposure to global standards, modern cleaning technologies, and trending industry practices that strengthen both quality assurance and sustainability.

The course introduces scientific principles and evidence-based practices for cleaning validation, focusing on environmental monitoring, data-driven decision-making, and documentation. It highlights the importance of validated procedures to prevent cross-contamination, safeguard product quality, and align with Good Manufacturing Practices (GMP), HACCP, ISO, and FDA regulations. By integrating case studies and real-world examples, participants will develop the skills to design, implement, and evaluate cleaning and sanitation protocols in alignment with current global expectations.

### Programme Curriculum

#### Validation of Cleaning and Sanitation Procedures Training Course

##### Introduction

Validation of Cleaning and Sanitation Procedures Training Course is designed to equip participants with practical knowledge, advanced techniques, and regulatory insights essential for ensuring effective cleaning and sanitation in industries such as food processing, pharmaceuticals, manufacturing, and healthcare. This program emphasizes process validation, microbial control, hygiene management, and risk-based approaches to

enhance safety, compliance, and operational excellence. Participants will gain exposure to global standards, modern cleaning technologies, and trending industry practices that strengthen both quality assurance and sustainability.

The course introduces scientific principles and evidence-based practices for cleaning validation, focusing on environmental monitoring, data-driven decision-making, and documentation. It highlights the importance of validated procedures to prevent cross-contamination, safeguard product quality, and align with Good Manufacturing Practices (GMP), HACCP, ISO, and FDA regulations. By integrating case studies and real-world examples, participants will develop the skills to design, implement, and evaluate cleaning and sanitation protocols in alignment with current global expectations.

### **Course Objectives**

1. Understand validation principles in cleaning and sanitation procedures.
2. Learn regulatory requirements and international compliance frameworks.
3. Apply risk-based approaches in sanitation validation processes.
4. Develop robust cleaning protocols for critical control points.
5. Master microbial contamination prevention strategies.
6. Conduct environmental monitoring and data analysis.
7. Design effective sampling and swabbing strategies.
8. Evaluate detergent and disinfectant effectiveness.
9. Implement process validation with trending technologies.
10. Strengthen documentation and reporting practices.
11. Integrate cleaning validation with GMP and HACCP programs.
12. Analyze case studies to reinforce practical application.
13. Build sustainable and efficient sanitation systems.

### **Organizational Benefits**

- Improved compliance with global hygiene regulations
- Enhanced product quality assurance
- Reduced microbial risks and cross-contamination
- Cost efficiency in sanitation processes
- Increased customer trust and brand reputation
- Streamlined cleaning validation audits
- Higher operational efficiency with validated procedures
- Risk mitigation in production environments
- Adoption of innovative cleaning technologies
- Sustainable sanitation strategies for long-term impact

### **Target Audiences**

- Quality Assurance Managers
- Food Safety Professionals
- Sanitation Supervisors
- Production Managers
- GMP Compliance Officers
- Environmental Health Specialists
- Pharmaceutical Validation Teams
- Regulatory Affairs Professionals

**Course Duration:** 5 days

## **Course Modules**

### **Module 1: Fundamentals of Cleaning and Sanitation Validation**

- Principles of cleaning and sanitation validation
- Importance of validated processes in industry
- Key international standards and guidelines
- Introduction to risk-based approaches
- Documentation requirements
- Case study on poor validation outcomes

### **Module 2: Regulatory Frameworks and Compliance**

- FDA, ISO, and GMP regulations for sanitation
- HACCP integration into cleaning validation
- Role of regulatory audits and inspections
- Compliance gaps and common challenges
- Aligning sanitation with international standards
- Case study on regulatory non-compliance

### **Module 3: Microbial Risk and Contamination Control**

- Sources of microbial contamination
- Microbial control strategies
- Risk assessment methods
- Environmental hygiene monitoring
- Role of disinfectants and sanitizers
- Case study on microbial outbreak prevention

### **Module 4: Environmental Monitoring and Sampling Techniques**

- Swab and rinse sampling methods
- Airborne contamination control
- Surface testing protocols
- Frequency of monitoring and validation cycles
- Data-driven monitoring systems
- Case study on environmental monitoring success

### **Module 5: Detergents and Disinfectants Validation**

- Types of cleaning agents and sanitizers
- Factors affecting cleaning efficacy
- Validation protocols for detergents and disinfectants
- Residue testing procedures
- Compatibility with equipment and materials
- Case study on disinfectant failure investigation

### **Module 6: Cleaning Process Design and Implementation**

- Developing effective cleaning protocols

- Cleaning-in-Place (CIP) and Cleaning-out-of-Place (COP) systems
- Optimization of sanitation frequency
- Resource management in cleaning programs
- Verification of cleaning efficiency
- Case study on CIP system validation

#### **Module 7: Documentation and Recordkeeping in Validation**

- Importance of accurate documentation
- Standard Operating Procedures (SOPs)
- Validation protocols and reports
- Audit trail and data integrity
- Regulatory expectations in recordkeeping
- Case study on documentation gaps

#### **Module 8: Case Studies and Best Practices**

- Review of real-world validation failures
- Analysis of global food safety incidents
- Pharmaceutical cleaning validation lessons
- Best practices from leading industries
- Integrating continuous improvement strategies
- Case study on successful validation program

#### **Training Methodology**

- Interactive lectures and expert presentations
- Group discussions and peer learning sessions
- Practical demonstrations of cleaning protocols
- Case study analysis and role-play exercises
- Hands-on application of sampling and testing methods
- Real-time feedback and performance evaluation

#### **Register as a group from 3 participants for a Discount**

Send us an email: [info@fineskilltrainingcenter.com](mailto:info@fineskilltrainingcenter.com) or call +254769199797

#### **Certification**

*Upon successful completion of this training, participants will be issued with a globally- recognized certificate.*

#### **Tailor-Made Course**

*We also offer tailor-made courses based on your needs.*

#### **Key Notes**

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.

- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to FINESKILL TRAINING CENTER account, as indicated in the invoice so as to enable us prepare better for you.

## Upcoming Scheduled Sessions

| Start Date  | End Date    | Location | Price   |
|-------------|-------------|----------|---------|
| 07 Sep 2026 | 11 Sep 2026 | Physical | \$1,500 |
| 14 Sep 2026 | 18 Sep 2026 | Physical | \$1,500 |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$1,500 |
| 28 Sep 2026 | 02 Oct 2026 | Physical | \$1,500 |
| 05 Oct 2026 | 09 Oct 2026 | Physical | \$1,500 |
| 12 Oct 2026 | 16 Oct 2026 | Physical | \$1,500 |
| 19 Oct 2026 | 23 Oct 2026 | Physical | \$1,500 |
| 26 Oct 2026 | 30 Oct 2026 | Physical | \$1,500 |
